### 2012 SFPA and IFC code updates

FIREGUARD N FIRE

STI consultants Marshall Klein, PE; and Jeff Shapiro, PE, FSFPE, of International Code Consultants, provide detailed updates of 2012 NFPA and IFC codes. We extend our thanks and appreciation to these code experts for this important industry information.

#### Did you know?

Since Oct. 1, 2012, every gallon of heating oil in New York City must contain at least 2% biodiesel. The blend is known as Bioheat fuel, a greener heating oil that

exchanges with experienced industry people, on a variety of issues.

[Click here for expert opinions](#) from Jeff Shapiro, International Code Consultants; Wayne Geyer and Lorri Grainawi, STI/SPFA; and Chip Stein, Tank Industry Consultants:

- **Permatank** backfill and ballast
- **Fire water storage tank** inspection standards
- **Vent pipe and fill pipe** relative size
- **Jacketed tanks** and corrosion

## EPA hires Battelle for UST leak detection study

sherlock leak  
detection

To gauge whether traditional protocols are viable for new fuels storage leak detection, Battelle Memorial Institute Laboratories is performing a technology assessment.

The project will analyze existing information on leak detection technology operating principles and characteristics of ethanol-blended fuels to assess any potential leak detection technology issues.

[Back to top](#)

## Counterfeit "Made in USA" pipe failure

Counterfeit pipe failure

A steamline split recently in a 300MW unit at the Datong Power Station Unit 2 in China.

The investigation indicates that the pipe, while marked "Made in USA," was actually manufactured by a Chinese pipe mill.

## Tank and Petroleum Mishaps

[Explosion on refinery in Mexico \(09\\_19\\_12\)](#)

**Mexico:** A tank explosion at a Pemex refinery in Mexico killed 31 and injured 47 people on September 18, 2012.

The video at left is from a security camera, showing that the incident originated in a central gas and condensate receiver. Visible are a couple of vehicles and at least two workers hit by the explosion.

**Explosion at Pemex in Reynosa, Tamaulipas, Mexico**

**Florida:** Tiny pinholes in FRP storage tanks allowed brine to leak

*is gaining popularity in  
Northeastern and  
Mid-Atlantic states.*

### Water infrastructure: rising concern

PIPE and RUNOFF

More than 22% of US and Canadian potable water pipe is over 50 years old, generating more attention to the need to upgrade our infrastructure.

In the US, an investment of \$334.8 billion is needed to improve the water infrastructure.

### Steel stands up to F5 tornado

Steel stands up to F5 tornado

"When a band of tornadoes cut across the Midwest last spring, one of the hardest hit communities was Henryville, Indiana. There, one resident died and nearly 100 homes, several businesses and the community's school were heavily damaged or destroyed."

Photo: Bruce Cunningham, South Harrison (Indiana) Water Corp.

That's the beginning of an article titled "Helping Hands" in the November/December issue of *Water*

*Storage Operator* magazine.

More industry events:  
[2012-13 Industry Calendar of Meetings](#).

The devastation was horrific, but Henryville's steel water storage tank stood up to the tornado. The 280,000 gallon tower needed \$200,000 in repairs and updates (including a new epoxy lining), "but engineers said the basic structure was still sound."

## Fast lubes thrive for steel tank market

fast lube interior

"Fast lube" outlets are a rich market for steel tanks, in both upstream and on-site locations. According to National Oil & Lube News, that industry is thriving.

## Ford, GM: E15 OK only in new vehicles

E15 logo

The trade publication *Oil Express* reported in October 2012 that Ford Motor Co. and General Motors have approved gasoline blends with up to 15% ethanol for use in 2012 and 2013 model year cars and light trucks. These two automakers produce more than a third of the light-vehicles sold in the US, according to *Automotive News*.

## Online learning--does it work?

webinars icon

*By Ben Thomas*

In May of 2009, I delivered what I believe was the nation's first live, online state-approved Class A/B UST operator webinar.

From the comfort of my Washington-based office, I was able to guide thirty-five or so slightly bewildered Colorado operators through everything from tank registration to spill bucket cleaning.
